

SENIOR ECONOMIC ANALYST

Energy, Economic and Environmental Consultants (E3c, Inc.) is accepting applications for a Senior Economic Analyst specializing in natural resource economics. This is a unique opportunity to become a long-term member of a growing consulting practice where you can direct your professional future.

Applicant must have minimum of Master's degree to be considered, and several years employment experience in energy or natural resource-related field preferred. Proficiency with numerical analyses must be demonstrated by prior experience, and familiarity in large numerical database analyses is a significant qualification (e.g., SAS, SPSS, DB2, Microsoft Access and Excel analyses of large numerical datasets). Candidate must be able to pass U.S. Department of Justice security check.

Candidates must possess superior math, writing and computer skills. Demonstrated excellence of work ethic, sophisticated communication skills, exceptional organization skills and strategic analytical dexterity are important attributes for success. A candidate's "analytic" capabilities will be fully engaged and augmented by the unusual challenges of this position. The position requires a high energy individual who projects a professional demeanor and will accept diverse responsibilities with an inspired attitude and participate enthusiastically in the entrepreneurial challenges of continuing development of a consulting practice. An individual with the ability to complement existing consulting practice by incorporation of specific additional natural resource research and consulting expert services is desirable.

E3c, Inc. provides economic analyses and expert testimony primarily related to energy market regulation, natural resource valuation, natural resource policy and strategic planning for large end-use energy customers. We have experience in broad areas of natural resource economics applied to legal and capital investment decisions, with focus on energy, water resources, regulated and competitive market valuation, and commercial damages. Employment with E3c will provide diverse responsibilities, including research, writing, oral presentation, statistical and graphic analyses, and litigation support services. We offer a complete and competitive benefits package.

Interested candidates should submit a cover letter with curriculum vitae, research paper, non-confidential expert report, sample deposition or trial transcript of testimony, and three letters of reference.
